IMPACT: State

Summary of Legislation: (Amended) This bill requires the Division of Family and Children to adopt rules to require that each child who is less than 18 years of age and who resides in a family that receives monthly cash assistance payments through the Temporary Assistance to Needy Families program (TANF) receive the childhood immunizations recommended by the American Academy of Pediatrics. The bill provides an exemption to the immunization rule if: (1) the parent or other adult caretaker relative refuses to have the child immunized because of religious beliefs; or (2) the parent or other adult caretaker relative provides documented medical evidence from a licensed physician that an immunization is not available or appropriate for the child.

Effective Date: (Amended) Upon Passage.

Explanation of State Expenditures: This bill requires each child in a TANF family to receive the childhood immunizations recommended by the American Academy of Pediatrics. Family and Social Services Administration (FSSA) reports that this provision will affect about 1,882 cases within the TANF control group. Failure to comply would cost a TANF family \$59 per month. Based on compliance rates within the TANF treatment group, expected expenditure reductions from sanctions in the control group are about \$100 per month.
